

InterconAction Extra Cards

Scenarios for the beginning of the game

Scenario 1.

A nuclear explosion happens in a country of your planet. Food and water are not safe anymore. Some people can buy food elsewhere but it is more expensive. Only people who have enough money or who have contacts in other countries can find a better place to live.

Pollution : 4

Social Exclusion and discrimination : 3

Economical inequality : 3

Disbalance in access to food and water : 2

Scenario 2.

Big economical crisis in your planet. A lot of people become unemployed and poorer than ever. At the same time, governments increase taxes. To survive, some people decide to sell their organs, to steal, to build parallel business. But people are divided.

Pollution : 2

Social Exclusion and discrimination : 4

Economical inequality : 4

Disbalance in access to food and water : 2

Scenario 3

Genetically Modified Organism are becoming more common around the world. Some scientists already proved that GMO have an impact on soils and nature, on human health, and so on.

Pollution : 3

Social Exclusion and discrimination : 2

Economical inequality : 3

Disbalance in access to food and water : 4

Scenario 4

World War III! All your countries are involved. Food is missing, a lot of houses and hospitals are destroyed. Citizens are divided about how to react against it.

Pollution : 2

Social Exclusion and discrimination : 4

Economical inequality : 3

Disbalance in access to food and water : 3

Scenario 5

Corrupted elections in one of your countries. The new president is a dictator. All of your countries do not react, so they support it.

Pollution : 2

Social Exclusion and discrimination : 4

Economical inequality : 4

Disbalance in access to food and water : 2

Scenario 6

Invasion of aliens! People are scared even if “invaders” are peaceful: it is maybe a consequence of bad movies they saw? Anyway, in order to survive, aliens decide to take a revenge on you.

Pollution : 4

Social Exclusion and discrimination : 2

Economical inequality : 2

Disbalance in access to food and water : 4
