"Active table game"

Rules

Preparation of the game

- Divided the group in teams balanced for number of member. Minimum two teams.
- Decide one person that will be the master of the game.
- Objective of the game is to conquer as much countries and points as possible.

How to conquer countries and points

- The game is divided in rounds,
- One team start and choose one countries from the map,
- The master choose random a task from the task card,
- All teams have to Do/answer to the task,
- The team that answer/won to the task competition, take 1 point,
- If the task will be won by the team that choose the country have to put their flag on the country conquered,
- If the task will be won from any other team that didn't choose the country will win 1 point but not will conquer that country
- This is a round.
- The next round other team have to choose a country and answer to the task to conquer that country.
- If one team during his round didn't conquer the countries that choose the next round can't try to conquer the same country.

General Rules

- The team that answer correctly to the task win 1 point.
- Each countries that you had conquered is 1 point
- If you conquered 4 neighborhood countries you get 4 points,
- If next to the 4 neighborhood countries there is one more country, is one more point. One point more, each neighborhood countries that you had conquered ($4+1=5\dots$).
- Is not allowed to use internet to answer to the task.
