

Visual Dictionary

not just any

by yasindbulat

a visual dictionary for facilitators, trainers & the viusal scribing community.

Not just any visual dictionary

is a personal passion project inspired by the visual facilitation cookbook and is a love letter to the facilitators, trainers and the visual scribing (graphic note-taking or visual facilitation) community.

It is created to empower educators and leaders who want to go beyond the restricting realm of language and bring colour to their sessions and events.

In these six pages, you will find 120 different symbols and graphics that support your message in a variety of way for different topics. The definitions below them are just an example and each visual can be used in combination with others. The visuals are of course non-exhaustive.
