

Competencies cards

The Competencies cards represent competencies (skills, knowledge and attitudes) that, in real life, every volunteer should have in order to improve him/herself and to participate in more complex activities.

For the purpose of “Let´s volunteer game”, they should be designed like little card certificates with an explanation in one sentence what that competence is and each should be printed in 4 copies.

- *Everybody who wants to download this game for a specific target group can add of change some competences. –*
