What we want to achieve is  
**gamification of Europe!**

The aim of the project is to deepen the understanding of democratic fundamentals of the European Union and develop a learning tools – in the form of board games to attract youngsters in our country with the topic of Europe.

Objectives are to:

- analyze the institutional system of the EU with the special focus on youth policy and democratic processes that young people can influence,
- introduce gaming into education about EU issues,
- develop edu-tools to conduct European Youth Dialogue consultations,
- develop educational scenarios based on board games which will be used for the future work of our organizations.

At the end of this project we want to have several board games produced that all our partners can take home and use in their mission of bringing young people to the EU.
