## ABOUT THE PROJECT

---

The mobility was focused on youth with a disability, the social business that support and help them and ways how to foster their inclusion into society also during taking part in the European project.

The topic has been so interesting and discovering for many and they decided to go deeper into the topic of youth with disabilities and lack of equity, especially in terms of access to the labour market. The social enterprise is offering some jobs but most of the people with disabilities felt they are positively discriminated. After the discussion, we came up to the idea to make this project as mainly for youth workers who are directly involved in helping youth people with disability in finding a job and better establishment in the labour market.

The main aim of the project is to use the non-formal education to equip youth workers with tools and methods that after can be used in tackling long-term unemployment among young people with disability.
