EXPERIMENT TEATRU
CLANDESTIN

THE GREEN RURAL HUB

Lazareni Comune, Transylvania, Romania

Co-funded by European Union

Our aims are to equip 22 youth workers from 5 countries, with tools and methodologies in order to be more aware on how to approach youths with fewer opportunities and help personal growth, to motivate, develop and raise awareness and solidarity of participants with sustainable skills, permaculture principles and green practices.

The main activity of this project is a TC of 8 days in Lazareni, where we will equip 22 youth workers from 5 countries (RO, MK, DK, IT, HR) with competences and methods that will enable them as ambassadors of healthy local communities. ETC's methodology for this project combines three main pillars (art-based activities, organic farming practices and ecology activities), hence the participants will be guided through an authentic approach, experiencing all the methods in the middle of ETC's farm.

The group will be guided towards a deeper understanding on how to combine different topics in order to initiate and run functional and healthy local communities for young people who face economical, social and educational limitations.

During the course you:

- 1 . Discuss and listen
2. Sharpen your Social Skills (empathy, communication, awareness, teamwork, creativity)
3. Meet other educators, youth workers, community leader s and activists, getting to know their challenges and daily work
4. Learn and grow
5. Meet a group of like-minded, engaged people who really care
6. Have the chance to share your own expertise and start new collaborations

AND MORE :)
