YWW&A

YWW is a Partnership Development Activity about **Quality** and **Dissemination** in Erasmus+ projects.

The main aim of the meeting is to establish an informal network of partners that share values and high standards in Youth work on the European level, with a main focus on mobility programs for Youth and Youth workers. We want to fix a set of agreements, taking into account the responsibilities and benefits of the partnerships both as sending and hosting organizations.

As a result of the work, we plan to create a draft of the website, as a sort of platform with a map where we plan to gather all partners that are willing to share this approach in work.

Also, we plan to add the part that will make visible the capacities of every partner for impact and dissemination, where we plan to define the reach and influence of our network partners across various levels, national, European and beyond.

We aim to measure the effectiveness of our dissemination and impact strategies by assessing the number of stakeholders reachable directly via email or phone, as well as through social media channels and websites.
