## 28 years working for a fairer, solidary, inclusive and sustainable world

Amycos is a Spanish non-profit organisation, based in Burgos, with **28 years of experience** working in international cooperation and Education for Sustainable Development (ESD).

In the field of international cooperation we support projects in **Nicaragua, Bolivia, Guatemala and El Salvador**, co-financed by public administrations from local to national level. Since 1996 we have maintained, with contributions from private donors, an **educational programme** in Nicaragua in which 200 students participate.

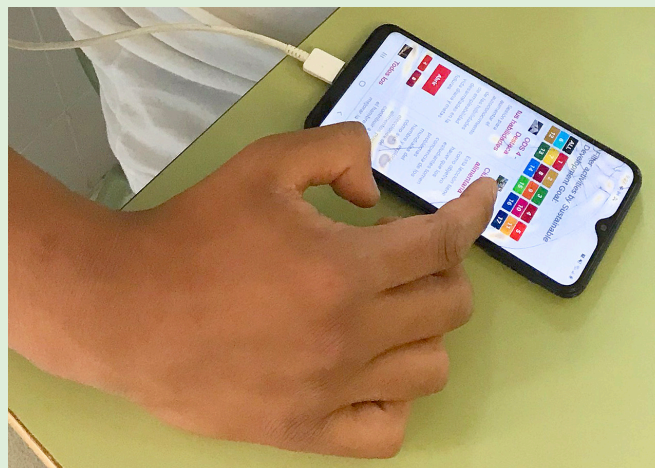

At ESD we have **edited and published a multitude of materials** in different formats: exhibitions, audiovisuals, didactic units, educational worksheets, games, etc. on topics related to the **Sustainable Development Goals** and **Human Rights**.

Amycos believes that **volunteering is very important**. Since its creation, it has facilitated

the involvement of young spaniards in the projects developed by our partners in **Latin America**. Also, for the last 10 years, we have participated in the **European Solidarity Corps** (ESC), previously in the EVS, as well as in the **Universal Civil Service** of the Italian Government. Currently the organisation is accredited as a **hosting and sending** organisation of the ESC with the **quality seal** of the programme.

Amycos has participated in **KA1, KA3** and **CERV** Erasmus+ projects on topics related to youth, active citizenship and interculturality. In 2019 we were approved, as **coordinating organisation**, for the KA2 project **Stairway to SDG** to promote the Sustainable Development Goals within **Vocational Education and Training** through a website and an APP. In 2021 we were approved again in KA2 for the second part

of the project, **Stairway to SDG 3.0**, for which we are developing an e-learning platform and a 2D game until the end of 2024.

Amycos was declared in 2012 **Public Benefit Entity** by the Spanish Government and, since 2013, it has the **ISO 9001:2015 quality certification for its management system**. Strategic planning is important for the organisation, which is why it has a Volunteering Plan, an Education for Sustainable Development Strategy, a Gender Policy, an Equality Plan and a Child Protection Policy.

Amycos **participates in several networks**, such as the Development Cooperation NGOs Platform in the region, which it currently chairs; in the Local Volunteering Platform; in the Municipal Working Group for Fair Trade; in the 4.7 Movement on Education for Sustainable Development; and in the national cross-

sectoral platform "Futuro en Común" which monitors the implementation of the 2030 Agenda in Spain.

Additionally, Amycos is the owner of a **social economy company**, IDYCOS sl, which specialises in **graphic design** and **corporate communication** for non-profit organisations, which has also participated in the "Stairway to SDG" projects.

Amycos aims to focus its work on informing about the unfair consequences of the **climate crisis** and **promoting sustainability**, both in formal and non-formal education. We aim to design useful tools for young people, schools and organisations to acquire knowledge, skills and attitudes in relation to the ecological transition and the **European Green Deal**. However, we are also open to other issues that fit in with the organisation's objectives.

**Do you think we can work together?**  
**We are waiting to listen to your proposal.**

THERE IS NO

PLANET B

Amycos is a Non-Governmental Organisation for Development Cooperation (NGDO) whose main objective is the promotion of global justice and the integral and harmonious development of the planet. To achieve this goal we work in four distinct areas, guided by a cross-cutting strategy: >> **Development education and awareness-raising** to contribute to the social and solidary awareness of our community. >> **Political advocacy** so that those who exercise their decision-making capacity contribute to the socio-economic development of the populations of the South. >> **Cooperation projects** in which we try to improve the quality of life of the inhabitants of communities in the South by involving them in their own development. >> **Social action** helping the most disadvantaged groups in our region, focusing on immigrants. >> **Networking**, collaborating with other NGOs and getting involved in different national and international campaigns. And all from the perspective that solidarity is based on justice and equality, never on compassion and alms.
