

Erasmus+ Partner Organisation Form

A. Partner Organisation Details	
PIC	883020877
Full legal name	Barrio de Oportunidades
Acronym	BaDeO
VAT or TAX CODE	B72995715
Address (Street and number)	Cta. del Rosario, 8, Casa 1, 4F, Casco Antiguo
Country	Spain
Region	Andalusia
Post Code	41004
City	Sevilla
Legal representative	Mr. Carlo Marinelli
Website	www.barriodeoportunidades.es
Email	info@badeo.es
Telephone 1	+34 954 82 27 17
Telephone 2	+34 680 37 97 87

B. Profile	
Type of Organisation	Limited Liability Company
Is the partner organisation a public body?	No
Is the partner organisation a non-profit?	No

D. Background and Experience

Please briefly present the partner organization and its key activities

Barrio de Oportunidades (BaDeO) is a training centre that strongly believes in the innovation, modernisation and internationalisation of education by proposing itself as a hosting partner for Erasmus mobility projects run by schools, training providers and other organisations engaged in social promotion and formal and non-formal education for young people, adults and staff. BaDeO's mission is to improve the quality of education in Europe, contributing to the realisation of the European Education Area, fostering the exchange of good practices and innovation in education and training, reducing the skill mismatch in the local and European labour market also by promoting the internationalisation and harmonisation of professional figures within the EU for both young and adult learners. BaDeO carries out activities in the field of education, intercultural dialogue, training and professionalization guided by a cross-sectorial multidisciplinary approach: its work is based on providing professional and educational pathways for youngsters (structured training courses, professional work experience and work placements) and upskilling opportunities for teachers and school staff. In particular BaDeO, thanks to its extensive network of local companies, can organise internships for students in various fields, modelling them on the basis of the specific skills and learning expectations of the participants, through a careful knowledge and ability assessment, an orientation session and an interview with the host company. With regard to training for teachers and staff in formal and non-formal education, the organisation delivers training courses, job shadowing and other structured events aimed at language enhancement, learning and experimenting with innovative teaching methods, and the creative use of digital media.

For the implementation and management of every training activity, BaDeO's approach includes taking care of every aspect of the individual's mobility, providing logistical, board and lodging services to participants, ensuring organisational and individual mentoring and support before, throughout and after the mobility.

<p>What are the experiences of the organisation in the areas relevant for this application?</p>	<p>Ever since it was funded, BaDeO has developed considerable experience in planning educational activities that correspond as closely as possible to the needs and dispositions of the target groups and to the objectives of both its own educational initiatives and the projects of the partner institutions and organisations. Specifically, the organisation has contributed to the implementation, in all its phases, and to the success of numerous Erasmus initiatives and, in particular, of short- and long-term mobility in school and vocational education of young people, adults and training staff (KA1) and of strategic partnerships for innovation and exchange of good practice in the European educational area (KA2). From September 2023 alone, the organisation managed mobility groups with a total of 309 participants, of which 171 school-age learners took part in short- and long-term vocational training activities and placements and 138 school and vocational education staff engaged in structured courses, job shadowing and work visits.</p>
<p>What are the skills and expertise of the organisation?</p>	<p>Founded members of BaDeO have a huge longtime experience in the Erasmus domain and in the development of local communities, working especially with youngsters and students, youth worker and professionals in the educational sector. The organization uses the collaboration of numerous professionals through its network of contacts in both the local and international context. In this way, the organization can rely on a roster of human resources coming from different educational and professional paths so that, with all these variegated skills, they are able to include their formal knowledge into the organizational and teaching methods in order to achieve the best possible educational and individual results.</p> <p>In particular, the organization can offer a large number of structured courses and training activities that span all the priorities of the Erasmus program, for example by deepening the themes of:</p> <ul style="list-style-type: none"> - multiculturalism and multilingualism (through structured language enhancement programs geared toward sectoralization in STEM fields and professionalization in the fields of tourism, fashion, catering, and business management); - digital skills and ICT use for job and didactic purpose (mindful use of social media and technology; E-learning, distance learning and educational software); - Innovative Teaching Methods (Game based learning, Digital CLIL and Storytelling etc.).

	<p>All of this makes the organisation always well-informed about the needs of nowadays society, educational domain and labour market (both locally and at European level) and fully involved into the E.U. integration process.</p>
