D. BACKGROUND AND EXPERIENCE	
Please briefly present the partner organisation.	Cumhuriyet Teknokent Technology Transfer Office (TTO) was established in 2013 to bring the knowledge of Cumhuriyet University to the industry and business world. Presentation of scientific studies carried out within our university to the sectors in need, analysis, evaluation, licensing of studies that may gain commercial value, follow-up of the patent process, training, consultancy services carried out by university employees or application, realization and commercialization processes of partnered projects, legal, administrative, technical It is a structure established within TEKNOKENT to provide training and consultancy services on budget and budget issues and to coordinate the relevant units.

Our units serving within the scope of the organization's purpose and strategy.

Project Support Office

- Our main goal is to manage project resources in order to realize the R&D studies that our industry wants to do in order to solve the problems faced by our industry and create a new product portfolio by taking advantage of Sivas Cumhuriyet University academicians and research opportunities.
- In this way, it is aimed to increase our international competitiveness and exports and to be able to produce medium/high technology products. Another aim of ours as a project support unit is to ensure appropriate collaborations as a result of national/international project follow-up and relevant calls for OIZs, industrial R&D centers and SMEs in our region.

Intellectual and Industrial Property Rights Unit

- Our aim is to provide support to academics, students, industry and public institutions regarding information, awareness and process issues regarding FSMH.

University Industry Cooperation

- To produce solutions to the problems of our industry by using the research potential of Cumhuriyet University and thus to contribute to the goal of increasing our international competitiveness and increasing our exports to consist of medium/high technology products.
- Carrying out national/international projects together with OIZs, industrial R&D centers and SMEs in our region.

Awareness and Education Services

- This module aims to provide the business world with knowledge about conducting R&D projects, developing projects in cooperation with universities, and technology and innovation.
- Activities that can be carried out within the framework of the module include introducing universities to their competencies, resources and cooperation opportunities for the business world, new technologies, R&D systematics, etc. These can be listed as organizing training organizations on subjects and holding various information events for university-industry cooperation.

Entrepreneurship and Incorporation

- As the Entrepreneurship and Incorporation Unit, our main aim is; Sivas Cumhuriyet University academicians, students and Sivas residents are working on bringing new products and technologies to the economy.
- It is to support new business ideas with high added value in our region, including entrepreneurs. We provide this support mechanism with our pre-incubation program, Kule Pre-Incubation.
- In addition to our academics and students with innovative-based business ideas at Sivas Cumhuriyet University, they are entrepreneurs who are undergraduate, master's and doctoral students at domestic and international universities or who have graduated from these programs within at least 10 years and have a technology-based innovative project idea.
- Mentor support is provided for entrepreneur candidates who start operating in pre-incubation, while academicians and experts provide idea and information support on technical issues. In addition, participation in motivation-enhancing activities and trainings provides the opportunity to get to know companies with success stories.
- Entrepreneur candidates have the opportunity to benefit from the 3D printer and all other tools / materials in our prototyping workshop.
- Open office space can be allocated to both candidates who have entered the incubation process from pre-incubation and the companies established by our academics, where they can meet their office needs at affordable fees (310 ₺).
