

Where Water Meets Roots

Erasmus+ KA153 Training Programme
in Regenerative Practices
and Collective Intelligence

17th – 28th august 2026

Cobonne, France

In collaboration with [Permalab](#) (Regenerative Hydrology design office) and the [Alvéoles](#) (Permaculture Training Center) we are developing an Erasmus+ training programme for youth workers, educators, and community facilitators. The course will combine theoretical sessions and hands-on learning around three main pillars:

Regenerative Hydrology (keyline design, water management...)

Permaculture Design

Collective Intelligence Processes (tools for collaboration and co-creation)

➔ We are **looking for 5 partner organisations across Europe** who are interested in sending participants.

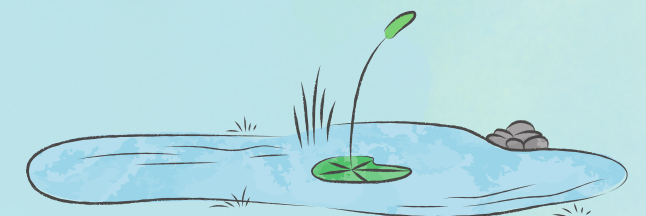

Total of 30 participants (18+) who are engaged or interested in ecological transition, participatory practices, and sustainable land-based living

Programme conducted in English.

All costs covered by Erasmus+

Where Water Meets Roots

and Collective Intelligence

Our association: Les Poules Rousses

We are a newly formed association based in Cobonne, Drôme a south-rural department in France. Since spring 2025 we are restoring a former farm with the aim of transforming it into a vibrant educational and experimental eco-center. **Our project is rooted in the regeneration of the land and the living, with a focus on agroforestry, environmental education, and the co-creation of resilient, sustainable ways of living.**

Our 6 adults team comes from backgrounds in environmental education and agroforestry, and we are passionate about creating a space for learning, sharing, and experimenting with solutions that respect and regenerate ecosystems.

If your organisation is working with youth workers, sustainability, permaculture, or community-based education, and you're interested in becoming a partner, we would love to hear from you !

Let's build something beautiful and regenerative together !
