

Cumhuriyet Teknokent

About us

Cumhuriyet Technopark is a science and technology park established in 2007 in collaboration with Cumhuriyet University, the Sivas Governorship, the Sivas Municipality, and other stakeholders. Our aim is to encourage young people to become technology producers and to support entrepreneurship. On a 91,476 m² campus, we provide 100 modern offices along with educational and social spaces, contributing to the development of young talent.

We offer mentorship, training, and project support programs to help young entrepreneurs bring their business ideas to life. Through software and technology training, we prepare them for the professions of the future. We also organize seminars and workshops to support their career development. By participating in local and international projects, we enable young people to have an impact on a global scale. As Cumhuriyet Technopark, we strive to help young people realize their potential and to build a sustainable future.

Objectives

Entrepreneurship Support

Innovative Training Programs

Social Responsibility Awareness

Career Development Support

Promoting Technological Innovation

Our Facilities

Companies

They join us by offering projects in R&D, software, and design. We offer mentoring, academic consulting, and project writing services to these companies.

Universities And High Schools

Vocational high schools and many university departments visit Technopolis regularly throughout the year. It's considered a career and job opportunity.

We provide internship opportunities to students and recent graduates.

Corporate collaborations

Cumhuriyet University: We collaborate in the areas of education, research, and innovation to provide support for students and entrepreneurs.

Sivas Governorship: By working with the local administration, we contribute to regional development projects.

Sivas Municipality: We organize social projects and events to support the integration of young people into society.

Sivas Chamber of Commerce and Industry: We establish connections with the business world to give entrepreneurs access to business opportunities.

Bilkent University Ankara Cyberpark: We share knowledge and experience in technology development and innovation.

TÜBİTAK: We receive support for research and development projects, helping young entrepreneurs bring their projects to life.

KOSGEB: We collaborate to provide entrepreneurs with access to financial support and consultancy services.

Cyber NEET

The NEET Pro Cybernetics Project is an initiative by Cumhuriyet Technopark aimed at enhancing young people's skills in the field of cybersecurity. The project seeks to equip youth with up-to-date digital competencies and increase their entrepreneurial potential in cybersecurity. The training programs cover topics such as cybersecurity threats, data protection, network security, and ethical hacking, offering participants both theoretical and practical learning opportunities. Supported under the European Union's IPA/NEET Pro program with a budget of €314,703.76, the project targets a young audience, including university students and recent graduates.

By the end of the project, it aims to improve participants' knowledge and skills in cybersecurity, increase their employability, and strengthen their entrepreneurial potential. In addition, mentorship support is provided to contribute to their career development. NEET Pro represents an important part of Cumhuriyet Technopark's efforts to enhance digital competencies and empower young people to make a difference in the field of cybersecurity.

The broader landscape of cybersecurity continues to shift rapidly as new technologies emerge, which makes initiatives like this especially valuable for building adaptive and resilient talent.

Erasmus+ experience

Projects conducted with Cumhuriyet Teknokent under the Erasmus+ Program provide young people with international experience and cultural exchange opportunities. These projects support academic and professional development, offering participants internships, education, and project involvement abroad.

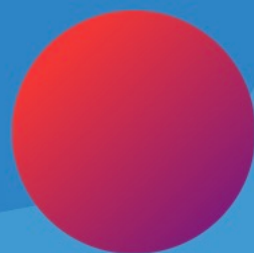

Key Benefits:

International Collaboration: Work with European universities and organizations, gaining exposure to different education systems and practices.

Target Audience: University students, recent graduates, and young entrepreneurs.

Personal & Professional Growth: Enhance communication, teamwork, leadership, and problem-solving skills.

Cultural Awareness: Interact with peers from diverse countries to broaden perspectives. Cumhuriyet Teknokent continues to support youth in gaining international experience and achieving their career goals through Erasmus+.
