1. Description

4Mazione S.r.l. is an Italian vocational education and training (VET) provider based in Forlì. The organisation works in initial and continuing VET, labour-market oriented training pathways, guidance, and personalised learner support. Its profile is strongly practice-based, with direct experience in training delivery, participant support, employability-oriented actions, and links with local labour-market needs.

4Mazione also develops assessment instruments for competences that are performed rather than written — where a trainer declares the reference and the learner has to approximate it. Its current line of work applies this to whistled languages, starting from the Silbo Gomero of La Gomera (UNESCO, 2009), and is the basis of an Erasmus+ KA220-VET Cooperation Partnership in preparation for the March 2027 deadline.

2. Activities

- Design and delivery of vocational education and training pathways, including competence-based and learner-centred approaches.
- Training activities connected to labour-market needs, employability, transitions and adult upskilling/reskilling.
- Guidance, inclusion measures and personalised support for learners and adult participants.
- Support to trainers and education staff on methods, quality and participant-centred implementation.
- Monitoring, feedback collection and continuous improvement of training and service processes.
- Development of measurement and assessment tools for practically performed competences, including offline software used directly by learners and trainers.
