Erasmus+

MOST IMPORTANT INFO

WHAT?

“Engineering Digital Safety”
Young people will be informed about information pollution in the digital world and supported in developing digital awareness, critical thinking, and safe online participation skills.

WHO?

Young people aged 13–30 who are participating in international youth exchanges to share experiences, learn together through non-formal activities, and develop social, intercultural and civic skills.

WHERE?

ISTANBUL MEDENİYET
UNIVERSITY
GOZTEPE/ISTANBUL

PROJECT GOALS

DIGITAL LITERACY

The rationale for implementing this project, which focuses on critical media literacy and safe digital engagement, is to raise digital awareness among young people across Europe and Turkey, increase their understanding of digital risks, and equip them with practical and applicable skills for safe, responsible, and conscious participation in the digital world.

RAISING AWARENESS

It seeks to equip participants with a nuanced understanding of digital literacy by grounding the subject not only in theory but in real-world applications connected to their daily lives.

COLLECTIVE EMPOWERMENT

By leveraging envisaged collaborations that synthesize academic knowledge, an engineering perspective, and field experience, the project aims to make a long-term contribution to empowering disadvantaged youth to participate as informed, secure, and active individuals in the digital world.

PROJECT ROADMAP

ARRIVAL & MEET

Participants will arrive at the accommodation and settle in. Following a rest period, ice-breaking activities will facilitate introductions and provide a general project overview.

WORKSHOP

The program will advance through diverse, hands-on workshops designed to deepen participants' understanding.

APPLICATIONS

Relevant to the project's scope, a series of hands-on practices and diverse activities will be carried out.

ISTANBUL TRIP

As part of our project, we will visit historical and tourist sites in Istanbul with our participants and experience the city's unique cultural delights.

CLOSING & EVALUATION

The day will conclude with a reflection session and a closing meeting to review the outcomes.

WHO WE ARE & PARTICIPANTS

WHO WE ARE ?

Istanbul Medeniyet University, a public university founded in 2010, hosts the Engineering360 Student Club, an active student organization that organizes projects, seminars, events, and educational activities, and actively participates in national and international projects.

ABOUT THE PARTICIPANTS

Young people aged 13–30 who are interested in digital literacy, media awareness, and safe digital participation, and who want to experience Türkiye, discover Istanbul's culture, and take part in an international learning environment.
