

Join Lunova — Build Something from the Ground Up

We're building a technology-driven, holistic recovery platform for individuals and families affected by addiction. We're looking for you to be part of this journey.

ISTANBUL · AGES 20–25 · VOLUNTEER

What Is Lunova?

Lunova is a **technology-driven, holistic recovery platform** created for individuals struggling with addiction and for their families. Our goal is to bring psychological support, family counseling, and legal guidance together in a single digital ecosystem to create an **accessible, sustainable, and safe model of recovery**.

Why Is This a Problem?

Addiction is not only an individual issue; it is also a social, economic, and psychological challenge with multiple layers. Existing systems fail to capture this complexity.

Why Lunova?

Lunova is an **impact-driven venture** founded to address this multi-layered challenge. Real support, real technology, real impact—all under one digital roof.

"Recovery is possible, and with the right technology combined with the right support, no one has to walk this path alone." — Lunova

We're at the 0→1 Stage

We're building the product from scratch, shaping the content language, and laying the foundation for global expansion. This is the most exciting – but also the most demanding – phase.

Global Team

We work alongside teammates from Kenya and India. Lunova is no longer a local project; it is an international vision.

English: Required

English is not a “nice to have” for us; it is essential. We are not looking for someone who will “do the translation,” but for someone who will help us build the product’s global language with us.

MVP Development

We are pre-investment. We are shaping the product, the content, and the team dynamic at the same time. Every contribution goes directly into the product.

 Lunova is part of BTM Istanbul (*Center for the Commercialization of Knowledge*). Our physical office is in Fulya, and a 24/7 accessible workspace is available.

What Kind of Person Do We Want to Work With?

We're not expecting perfection from you. We're looking for commitment, honesty, and a strong willingness to get things done. If this profile sounds like you, we'd love to talk.

20–25 Years Old | Istanbul

You live in Istanbul, are open to hybrid work, and want to be part of the startup ecosystem.

You're Studying / Have Studied in a Relevant Field

You are studying in, or have graduated from, a relevant university department. What matters more than your background is your willingness to contribute.

Advanced English

You're fluent in writing, reading, and speaking. Communicating with international teams and creating content doesn't intimidate you.

A Doer's Mindset

You're not just someone who learns — you're someone who gets things done. You're not afraid to take responsibility and you communicate clearly and honestly.

What Disciplines Are We Looking For?

Lunova operates with an interdisciplinary vision. To grow our platform and our impact, we need people from different fields. Even if you don't see yourself in this list — if you believe you can contribute, we still encourage you to reach out.

Mental Health and Support Systems

Psychology, Clinical Psychology (M.A.), Guidance and Psychological Counseling (PDR), Social Work, Sociology.

Technology and Data

Computer Engineering, Software Engineering, Artificial Intelligence and Data Science, Statistics, Biostatistics, Cybersecurity.

Management and Strategy

Health Management, Business Administration, Entrepreneurship, Industrial Engineering.

Communication and Design

Communication, Media, New Media, Public Relations, Advertising, Marketing, Graphic Design.

Law and Society

Law, International Relations, Public Health.

Finance and Operations

Finance, Accounting, Financial Management, Human Resources Management (HRM).

What Will You Do as a Volunteer?

No matter what background you come from, your responsibilities will be shaped by your interests and strengths. Your tasks will include both general responsibilities and duties specific to your area of expertise.

1 English Content Creation

Preparing English content for the product and platform; adapting Turkish content for a global audience instead of translating it word for word, and helping shape Lunova's international language style.

2 Internal Communication and Coordination

Supporting English communication with international teams, preparing documents and presentations, and occasionally managing meeting flow and notes.

3 Discipline-Specific Tasks

Taking on tasks needed in your own area of expertise, such as design, software, psychology, or law, and contributing directly to the platform.

Let's Be Clear About the Financial Situation

What Are We Offering Right Now?

Lunova is still at a very early stage: we are developing our MVP and are in a pre-investment phase. Because of this, we are not able to offer **compensation, benefits, or an official employment contract** at this time.

But this is not an internship or a "trial job" either. **This is about building something from the ground up.**

So What Do You Gain?

- Hands-on **practical experience** in a real startup environment
- **Global work experience** with teams in Kenya and India
- A chance to **actually use English** as part of the work
- Not just a portfolio, but **a story to tell**
- A chance to join the **core team after investment**

- ✓ Friends who are part of this journey with us will be taking the first step toward real roles and income when the company grows and we secure investment. Our goal is clear: to grow together and turn this into a professional structure.

Our Team Culture and BTM Istanbul

Our Team Philosophy

No Ego, No Titles, No Excuses

The only thing that matters is: getting things done, speaking transparently, and learning by doing.

Not Perfect, but Committed

We are not looking for a “perfect person.” We are looking for commitment. Someone who is not afraid to make mistakes and is ready to move forward honestly.

With an International Mindset

The energy and perspective that come from different disciplines are the most valuable part of this journey.

Why Is BTM Istanbul Important?

Lunova is part of the BTM Istanbul (*Center for the Commercialization of Knowledge*) Camp Program. This is not just an office, it is a **real entrepreneurial ecosystem**.

- 24/7 workspace in Fulya
- Shuttle service from Şişli Cevahir
- Opportunities to meet and network with other startups
- Hybrid work model

Application Process: Very Simple

You don't have to make anything “perfect.” It's enough to show us why you want to be here. When you reach out to us, don't forget to include the following:

01

Two Traits About Yourself

Write down one trait you like most and one you like least. For example: “My English is good, I enjoy translating, but sometimes I get lost in the details.” Just write whatever feels natural. This helps us understand both your voice and your English level.

02

Resume

Even if it's brief, we'd like to see what you've done. Past experience, projects, communities – everything matters.

03

Motivation and Intent Letter

A few sincere sentences about why you want to be part of this project are enough. “What are you expecting, why are you excited, what will this journey bring you?” A heartfelt answer to these questions is all we need.

- ❏ When joining Lunova, you must accept the obligations outlined in the KVKK and privacy agreement. This is an important step to protect both your rights and ours.

Let's Talk

This opportunity isn't for everyone. But if deep down you're saying **"I need to be part of this"**, if you're eager to build something global from scratch, and you're not afraid to start — we're waiting for you.
