OUR VALUES

We believe in creating meaningful learning experiences that are inclusive, participatory and experiential. We value creativity, giving young people space to express their ideas and findings in their own ways. Through workshops, group discussions, teamwork and peer learning, we encourage collaboration and learning from one another.

We promote intercultural understanding and respect, while ensuring that young people have an active voice in decision-making and project design. Through reflection activities, we support self-awareness, critical thinking and personal growth.

OUR FOCUS AREAS

Our work focuses on creating opportunities for young people to connect, learn, express themselves and actively contribute to society. We organize youth exchanges that build bridges across Europe and promote social inclusion, intercultural dialogue and active citizenship.

Through non-formal education, outdoor learning and creative activities, we make learning engaging and meaningful. We also support mental wellbeing and personal growth, while exploring AI, digitalization and media literacy to help young people navigate the digital world critically and responsibly.

We use forum theatre, art and creativity as tools for self-expression, dialogue and social change, while community engagement and cultural exchange help connect people, celebrate diversity and strengthen communities.
