Methodology

The working methods of the seminar are non-formal and based on participants' participation (learning centered). For this we let the participants set their learning goals in the beginning of seminar and reflect the outcomes every day.

Each partner organisation sends 2-3 representatives. The approach of the Seminar will thus be very collaborative, and include elements of training course, seminar and partnership-building activity.

Participants will have the opportunity to get new or deepen their knowledge in youth migration & mobility, share best practises with their colleagues and spent quality time for introspection and reflection of their work and future collaborations. They will learn how to work within their communities and how to use different tools and techniques, working with young migrants in their local communities.

Activities

We will use small and big group discussions, role-plays, forum theatre elements, quizzes, meetings with local migrants and local council, artistic workshops, self-evaluation, work in pairs and other non-formal methods which are suitable for this target group. It is crucial that participants will learn from each other, and exchange their ideas to gain new knowledge, skills and attitudes during all activities .
