Oxygen association

a breif

## About

Oxygen is a registered nonprofit association. It is located in Amman and started in June 2015 to promote social development and creative education in nonformal methods, art expression tactics and international cooperation.

Oxygen works with children and youth from the age 10 to 30 years old. The main purpose of this organization is to introduce the participants to exotic life experiences and opportunities where a space of comfort is found to express, develop and learn better perspectives of life understandings. And also to support productive youth learning about equality and peacefulness in their community.

We also encourage young people to be responsible for their societies needs. This is when Oxygen takes part to involve the youth in a nonformal education with an international cooperation.

## Our Work

We work on raising awareness among young people to respect the environment by recycling, renewable energy and agricultural projects. This way we motivate them to value nature and to inspire other people around them.

Oxygen second goal is for children and young people to acknowledge Art education and brainstorming ideas. Expressing creative messages to be shared with the society through filming, Art & crafts and workshops. A hope for a brighter future away from stereotypes and bad habits and instead self-development and positive atmosphere.

Last but not least, Oxygen builds strong partnership with multiple organizations and movements from around the world. We look forward to strengthen the relationships and bonds with particular nations. We can prove intercultural dialogue, gain and share experiences, develop techniques and methods of education, host and send coordinate actions, youth exchanges, youth gathering and Volunteering opportunities.

## Our Community

We are a group of youth coming from different cities and varieties of backgrounds in Jordan, experienced with civil society and youth of action work, volunteerism, international and local cooperation, filming and art education, culture and lifestyle experiences.

We seek imagination in people's life, opening new horizon, reaching beyond people's expectations. From our past experience with many NGOs, we came upon many obstacles that encouraged us to improve ourselves by focusing on the roots of the problem to change society and to look for better ways of communication. we explored the lifestyle of youth organisations and

supported many projects motivation to achieve their goals, we are aware of the importance of acting as a community that respect its youth and prove better chances to develop communication and encourage the creative expression, support self development and the interactive relation with environment for positive society lifestyle.
