ABOUT THE PROJECT

AIM

To provide a source of qualitative Environmental Education Activities & Games (EEAG) and to improve methodology for EEAG creation and conduction.

OBJECTIVES

- To share experience and discover new approaches in EEAG
- To research and introduce pedagogical trends and educational system of participating country
- To improve already existing EEAG
- To create new EEAG
- To test selected EEAG in local Eco-school
- To create EEAG platform - website, where all developed activities & games will be available
- To improve methodology for guidelines development for EEAG creation/conduction

LEARNING OUTCOMES

On completion of this course you will be able to:

- Use developed EEAG
- Demonstrate effective use of EEAG

FOR WHOM?

For youth workers, teachers, and active volunteers in environmental education field, and for everyone else who feels able to make a significant contribution in this regard.

ABOUT US

OUR ORGANISATION

NGO "homo ecos:" is a well-known environmental organisation based in Riga, the capital of Latvia. Its mission is to create a social movement that supports environmentally friendly ideas and gives advices for implementing a greener lifestyle. homo ecos: further promotes voluntary work and is involved in environmental education and communication, working with different target groups.

More information can be found in our website: www.homoecos.lv

ORGANISING TEAM

Our team consists of 4 young but experienced specialists in different aspects of Environmental Sciences, also having sufficient experience in the youth work field and environmental education.

SEARCH FOR PARTNERS

We are searching for approx. 10 partners who are interested in participating, and possibly partially in planning and implementing the proposed project.

ABOUT YOU

PARTNER ATTRIBUTES

The ideal partners should be able to fulfil the following descriptors:

- Experience in working with non-formal, and/or environmental education methodology.
- Able to recruit 3-4 participants for training course.

INTERESTED?

We ask you to complete the following Partner Form (is attached), so that we can assemble the most capable and dynamic team of partners.

Partner form/questions should be sent to EEAG team e-mail: eeag.team@gmail.com by **18 April 2016**.

Best regards,
EEAG project team
