SUMMARY

We are an innovative private school located in Sofia, Bulgaria. The institution is part of a larger network which includes entities in the field of business, non-governmental sector, culture, science and academia.

"Tzar Simeon Veliki" private school intends to be a standard for innovative, motivating, creative, healthy and positive environment and to support the personal potential of the students while developing their habits and vision for long-term success. The main scope of work is to promote **entrepreneurial spirit, soft skills, innovative and civic education** among youth.

The school slogan – "Knowledge means enlightenment" is connected to our vision to create a bridge between the historical period of the Golden Age of Bulgarian Culture during the time of tsar Simeon I and the present day via new technologies, innovation, entrepreneurship.

The program emphasizes on history, culture, civic and financial education and is based on the PBL.

WE PROVIDE STATE-OF-ART SCHOOL CAMPUS WHICH INCLUDES:

based on individual
performance

OUR INNOVATIVE EDUCATIONAL METHODOLOGY IS BASED ON:

The main activities of "Tzar Simeon Veliki" private school are innovative education, entrepreneurship, civic education focusing on development of comprehensive knowledge, key competences and transversal skills. We implement an innovative

Technological Pedagogical Content based on an integrated approach of different methodologies and technologies from formal and non-formal education.

In the context of entrepreneurial education, "Tzar Simeon Veliki" private school encourages the development of entrepreneurial culture and talent as they support the enhancement of the students' soft skills such as communicativeness, team work, creativity, flexibility and innovativeness.

In 2016 and 2018 "Tzar Simeon Veliki" school participated, as external partner, in the realization of "Erasmus+" project dedicated to the development of entrepreneurial and soft skills through project-based learning and non-formal education as well as to the career orientation of young people by examining the entrepreneurship from the view point of business, NGOs and education, which are key components of the entrepreneurial ecosystem, developed by Babson College.
