EVS project in Ukraine,
Vinnytsia

Eco City/Еко Місто

HOSTING ORGANIZATION:
COMMUNITY FOUNDATION
PODILSKA HROMADA

DATES: 1ST OF MARCH –
30TH OF NOVEMBER 2018

TYPE: KA1, EVS

SUBMISSION: OCTOBER 4

Ecological topic is very actual in every country now. But there are more progressive countries, which stopped using plastic bags, for example, and countries, which even don't separate trash. Situation in our country with trash regulation is really bad, there is no national program and infrastructure for trash separation. But our city was the first one in Ukraine where this program was implemented.

Local government, private business and community together realize this idea. The role of our organization is to lead informational campaign. This program works already for 2 years, the infrastructure covers 80% of the city territory. But many people still do not separate trash for different reasons: some people are not aware why they should do it, some thinks that any way all trash is going to one place, some just don't know how to do it.

To increase awareness of citizens about ecological problems and importance of trash separation we organize many different activities: trainings, eco-weeks, visits to waste sorting line, meetings and events. Also different projects has been implemented: calendar “12 useful habits”, “Postcard from Vinnytsia”, “EcoTakt” – short radio programs, volunteer movement EcoTeenagers, board game “Eco-battle”, containers for used things.

For the next year we plan to work more with schools as it is more efficient: children perceive information better than adults, plus they share what they learn with their families.

We would like to invite EVS volunteer for Eco City project because it can bring new creative ideas and experience from another country to improve our project. In the same time volunteer can get an experience of work with kids at schools and youth in Vinnytsia, planning and organizing different events, project management, collaboration with local government and business. The volunteer will have an opportunity to improve communicational and organizational skills, ability to work in a team (as we work here as a team), space for his/her own ideas and initiatives.

This is a great time to do EVS in Ukraine as it is time of positive changes and growth of civil society!
