

[About](#) [Projects](#) [Erasmus+](#) [Press](#) [Contact](#)

Who we are?

Backslash is a non-governmental, non-profit, non-political youth organization, established in **Valencia, Spain**, which aims at empowering youth, promoting peace, tolerance and solidarity through assisting young people in acquiring knowledge and developing their skills and competencies.

The mission of Backslash is to **foster and support the sustainable development of local communities and individuals' empowerment through education and training**, human rights, democratic values and international cooperation.

The organization is oriented on accessing to social rights for youth, also fighting against discrimination, violence, xenophobia and exclusion affecting young people.

Activities

We can divide our main activity in two:

On the one hand, to promote **youth mobility** and to **support and empowerment** of young people directly, through one information desk we have in the municipality. From here we can be in contact with a lot of people, and to raise awareness about European citizenship among others

On the other hand, we focus on **communication**. We offer young people a lot of opportunities in Europe through our website [Aprovecha Europa](#), created to disseminate projects and possible experiences in Europe.

Staff

Erasmus+

Our staff is **full of experience in European Projects**, as well as on other topics as tolerance, conflict management, intercultural dialogue and coaching.

All the staff are **certified youth workers**, with years of experience working in the youth field from different sectors, as NGO's, public and private sectors. The Coordinator of Backslash is certified in **PRINCE2** (an acronym for PRojects IN Controlled Environments) is a

de facto process-based method for effective project management. He is also certified by the platform **SALTO-YOUTH** in various fields, as well as part of the **Pool of Trainers** of the Spanish National Agency for the Erasmus+ Programme.

Backslash team is very well trained in dissemination and exploitation of results because one of our main goals as NGO is to empower young people through informing them about the **opportunities that Europe provides them**.

What are we looking for?

We are **looking for partners** to collaborate in Erasmus+ Projects, mainly in KA2 and EVS projects. We also count with a wide network of partners (Universities, SME's, Municipalities, Regional Governments and other NGO's) willing to unite and collaborate together!
