We' d like to empower youngsters and also territories where they will act. Several activities of the project will take place in rural areas or small cities in order to boost those territories and give the opportunity to the populations living there, particularly youngsters, to be in contact with young strangers and develop their openness to the world and their will to move and discover it.

Our second guiding theme for PEACE project is to involve youngsters with fewer opportunities in it. Indeed this public often face difficulties to go abroad even to go on EVS, an action supposed to be open to all youngsters. We are also convinced that mobility and especially EVS can be a great tool for

We are sure only through activism, creativity and exchange we can build PEACE

However they are mostly active as a volunteers in our foundation /on local level/
