

Re -Turtle !

The sea turtles first started to visit Pamucak bay by 2013 but no longer much visit the bay of ancient city Ephesus named as Pamucak in Selçuk İzmir ! The guilt is shared sure to all of us.. We feared them with our wastes.. Those are sensible livings.. But its time to recall them !

In our project we want to form three dimensional sea turtles at different sizes with natural and non-natural waste materials in the concept of recycle and land art to call them back to this lovely bay ! Even surrounding eggng areas with them for the sea turtles ! Making warning signs for people also..

We want to build a net to express our message with nonformal methods trough the universal language of art within our partners coming from European Union Programme countries which has coasts surrounding Europe by three seas.

We want to celebrate 1st of June : " **The world sea turtle month** " with striking outcomes from our project !

Project Activity Time : 26 May - 2nd of June 2019

Project Venue : Pamucak Bay Selçuk İzmir

All food and accomodation will be covered in the budget system of KA105 YE - travels in distance system of Erasmus+

Note that we will stay in bungalows and-or tents in a natural place with mosquitos or other natural facts (wind-sea-bees etc.)..
