TECHNOLOGY

FOR SOCIAL DEVELOPMENT

Project Erasmus Plus by Amici del Villaggio - Rosà (VI) - Italy

SUSTAINABLE DEVELOPMENT GOALS

Funded by the
Erasmus+ Programme
of the European Union

The future is in
their hands

"TECHNOLOGY FOR SOCIAL DEVELOPMENT"

"Technology For Social Development" emerges from the idea of five young university students who operate as "tutors" within creative technology labs addressed to children and young people of the area, at the association Amici del Villaggio's Fab-Lab centre. The young tutors, together with the leaders of the association, propose, during this phase, to elaborate the themes of new technologies to give young people a chance to experiment educational robotics techniques, coding, basic automation and electronic, 3D printing and drawing, within a creative and free environment, which take advantage of participants' talent.

"TEACH STEAM"

"Tech STEAM", it is 6 residential days, in a facility in Bassano del Grappa, during the month of August 2019, open to European youth worker, to enhance learning methods, learn to transfer basic technology concepts, exchange experiences within the youth field between European associations, improve education quality.

A series of exercices and workshops, will provid the necessary tools to learn how to develop playful-creative environments within each group. Technology will be considered as "tool for change" to solve environmental and pollution issues, instrument of integration, personal growth, artistic expression, proper use of media.

"INCLUSIVE TECHNOLOGY"

"Inclusive Technology", is a 8 days youth exchange for young Europeans to put in practice the best techniques developed during the first phase. 35 young people will have the opportunity to practice the issues presented by the 2030 Onu's Agenda, trying to provide a solution, developing an invention. Will our youth be able to devise a new technology useful to humanity, related to the respect of water, pollution, migrations? It seems like in passionate environment like these it is possible.
