

We are looking for partners for an Erasmus+ Youth Exchange programme in august 2019

The project

The main goal of our association is to spread the idea of sustainable lifestyle. We focus our programme on environmental friendly building techniques and lifestyle. We offer the participants of this Youth Exchange program the opportunity to get an in-depth experience in these eco-conscious building techniques such as straw bale and clay constructions. Also they will have a chance to experience living in natural surroundings. The working language will be English.

About us:

We are a hungarian NGO looking for a partner for our Youth Exchange project. Our association was founded in 2004. Since then we had several volunteer projects with Hungarians. This year we are going to organize our first international event. The project is going to take place in our programme site, which is not far from Budapest.

About the site:

The place is situated close to Domony village among the Domony Hills. The site is surrounded mostly by fields and small forests. The village, train and bus stations are located within a few kilometres and can be reached on a dirt road. The area is great for hiking and cycling. The nearby lake with and open-air bath is a popular destination for hikers. One can get to the famous capital city Budapest in an hour by a direct train or in half an hour with a car.

Accommodation:

Participants are going to be housed in yurt tents that are massive in size therefore they are comfortable to live in. People can walk around in a standing position in the whole yurt, since the roof is higher than a human. One yurt is able to host 4-5 people comfortably. We require participants to bring their own mattress and sleeping bags.

We have outdoor passive solar heated showers and composting toilets as the most eco-friendly solution. We have clear drinking water from our own well. It is inspected and of very high quality spring water. We also have electricity available.

Who we are looking for:

We would like our partners to understand that the place is a remote area surrounded by fields and forests. Considering this we are looking for partner organisations who are dedicated to environmentalism and are in touch with young people who are suitable for the environment we can offer. For example, they don't mind sleeping in a big tent with more roommates on their own mattresses or use outdoor showers and composting toilets. This is a practice focused activity so participants should be able to do some light-physical work too. We can host english speaking candidates between 20-30 years of age.
