

Programme	Erasmus+ KA2 Strategic Partnership in the field of youth
Project title	FabLab and STEAM
Deadline	26/04/2019
Horizontal priority	Supporting individuals in acquiring and developing basic skills and key competences, in order to foster employability and socio-educational and personal development, as well as participation in civic and social life. Especially: - Promote interdisciplinary co-operation in science, technology, engineering, arts and maths (STE(A)M) fields;
Priority	Projects contributing to the EU Youth Work Agenda, by promoting quality, innovation and recognition of youth work. Especially: - Support the capacity building of youth workers and in youth work;
Objectives	Design and test tools for educators involved in the development, validation and promotion of STEAM skills acquired by children aged 10-15 years within FabLabs.
Intellectual Outputs	1) Manual for STEAM educators; 2) Toolkit for the validation of STEAM skills; 3) CV Maker online platform resource.
Partnership	<u>Lead Applicant:</u> Lumen Association (https://www.associazionelumen.eu/) – an Italian ONG which deals with social and collaborative innovation. Lumen also runs FabLab and FabLab Junior of Casa Corsini, two Italian success case. <u>Partners involved at this state:</u> - Aretés scarl – an Italian private research company with a huge expertise also in EU project management. It is actually involved as LP in the Erasmus+ project SAE (Smart Adult Education).
Call for partners	<u>We're looking for the following project partners:</u> - Organizations running STEAM education workshops and labs with children aged 10-15; - Organizations that carry out training for trainers, research and evaluation of the STEAM education such as universities, research centers, private evaluation companies etc.
