

MILDtheGAP: using Manufacturing Labour Demand to reduce the Skills GAP between Market and VET offer

Main objective of the project:

The project, focused on the Manufacturing sector, aims at reducing the skills mismatch between the Training offer and the Skills Demand (relating to some specific occupational profiles).

To achieve such a goal a skills gap analysis will be performed between the Labour Demand and the current professional training provided (EQF level 4) in the involved countries in order to integrate the related curricula.

The gap analysis will lead to the integration of curricula in terms of skills.

The final goal is to train professional figures appealing for the companies and easy to place on the market since they respond to the real needs expressed by companies.

Target Groups:

- Curriculum developing departments of Ministries / related institutions
- Job seekers
- Vet policy makers
- Vet providers
- Job Recruitment Agency (Public and Private)
- Job and career consultants
- Chambers of Industries

Intellectual outputs: Country Report on VET provision recognition, Comparative Analysis Report , The Labour demand in Manufacturing, Conversion tables, Gap

KA2: Cooperation for innovation and the exchange of good practices - Sector Skills Alliances

Sector Skills Alliances

Lot 2: SSA for Design and Delivery of VET - Two-year project

Deadline: 26/02/2020

Consortium:

8 partners

Length:

24 months

starting 1.1.2021

Analysis Report, Vocational Curricula, Comparative report, Impact analysis model, Guidelines for the delivery of vocational curricula, Evaluation reports on project's delivery, Strategic planning of dissemination, communication, exploitation, Project Portal, Dissemination materials, MILDtheGAP Final Conference publication

Consortium members are expected to have experience and competences experiences related to MILDtheGAP:

- Provision of VET curricula at ETF 4 in the ambit of Manufacturing with long and successful experience;
- concrete know-how on methodological analysis
- development of LMI system to specifically exploit the Big Data coming from the Online Job Vacancies to investigate the real labour demand expressed by the firms
- project management of international and cooperation projects
- creation of links with Manufacturing firms, representation of Sector interests and carrying out periodic benchmark analysis of international comparison
- Policy making in Education and VET at National level

International activities:

1. Kick off Meeting
2. Mid-term progress meeting
3. Workshops
4. Final Conference

Local activities:

1. Survey
2. Interviews and focus groups
3. Dissemination in each country
