GROUP PRESENTS

I SEE GREEN!

the project

"I see green" is a 10 days youth exchange aiming at raising awareness of youngsters, youth leaders and volunteers on environmental education with the use of audiovisual media as a tool.

During this exchange participants will have the opportunity to look into two basic questions:

- ***What is the content of environmental education targeted to young people?***
- ***How can audiovisual media be used to deliver this content in an attractive way to our beneficiaries?***

The training will take place in Ommen, the Netherlands at the Olde Vechte Foundation.

the method

The method we are going to use is based on learning by experience. We will combine sessions of environmental awareness and education, basic skills on audiovisual media, creativity and self expression.

target group

We are looking for organisations that have or want to develop an environmental profile, who want to participate, are committed to the project throughout its whole duration and want to train their youngsters workers and volunteers for this purpose.
