D. BACKGROUND AND EXPERIENCE	
Please briefly present the partner organisation.	Estrellita is a social enterprise, established in 2017, based on the belief that all people have the right to benefit from training and long life learning activities: training, leisure, sport, workshops (such as culinary, agricultural, and recreational workshops). However, the society in which we live is studded with cultural and even architectural barriers, which do not favor the achievement of these activities. Our mission is to make up for this lack by creating a model-place where all this can happen and can be a sample and example for a better society. Estrellita was born with this purpose by creating a social laboratory “La Bolla”, the point of arrival of a path of growth and awareness in the accessibility and sustainability sector. Accessibility, mobility, aggregation and work are the keywords of this project aimed at: improving the participants’ lives, empowering participants themselves through sport, lucid and agronomic activities, and promoting their wider social integration as the main part of the vision of the social enterprise. The realization of La Bolla has been possible thanks to the collaboration of the LAG (Local Action Group) of Canaveses Valleys of the entity responsible for the implementation of the Local Development Plan pursuant to the Leader community initiative of the Rural Development Program. Thanks to our daily activities and the job we have done during our years of activity, also in different enterprises and associations, we have a strong network of collaboration and cooperation made by schools (at primary and secondary, level), VET providers, youth associations, NGOs, public entities.
What are the activities and experience of the organisation in the areas relevant for this application?	We can offer our experience to people in topics such as: • Equal opportunities for all • Accessible and sustainable tourism • Specific needs • Disability • Green issues/Nature • Sport • Intergenerational dialogue Our activities Training on tourism: accessible and sustainable Manual and creative workshops Agricultural activities Synergistic vegetable garden

	Sensory paths* *Our lab La Bolla, for instance, offers a sensory path and a tree path with tactile maps. The first is conceived and designed to stimulate the senses through aromatic plants. A place that has the ability to improve our physical and psychological well-being. Emotions, memories and excitements: everything passes through the sense of smell, the oldest and most powerful of our senses together with touch, which guide us in every moment. The second path winds through 25 different types of trees with graphic, tactile and Braille descriptions with the help of QRcodes which refer to audio descriptions in Italian and English.
E. THE TEAM	
What are the skills and expertise of key staff/persons involved in this application?	Our team consists of people highly experienced in undertaking various projects and working towards creating a civil society, to the benefit of the everyday citizen. The two following key persons involved in the project have been working with the organization since its beginning and they had the opportunity to professionally grow together with it. Both of them share the organization mission and values; they have different but complementary competences and attitudes to approach and solve the problem; they represent a small, efficient team, used to working together. Both of them planned and managed the huge event “Spingi lo sport” the event sponsored by the Piedmont Region which aimed to raise funds for the purchase of more than hundred wheelchairs, through the organization of two events: a foot race made up of teams made up of an able-bodied person and a person with a disability and a stage of the Handbike tour of Italy. Estrellita was born from this great experience. In addition, both of them are collaborating with local health entities and ANFASS - national association of families and people with intellectual disabilities and neuro-developmental disorders-for sporting practice; both of them are members of the “Campo Sport club”. Alessio Truchetto A degree in law at the University of Siena, he has got a certification in “Superior technical procedures for access to Community contribution, national and local. He worked within the field of Research and design of European call for many years. He is characterized by a natural talent for analysis and synthesis helping him to be objective and practical. With this approach he is facing the challenges of Estrellita projects.

Giorgia Scienza

A degree in Communication at IULM of Milan. After ten years of travel as a tour leader in the meetings industry, conferences and events around the world, she started in 2000 her own business in the tourism field opening the Tour operator "ProntoTours" for the organization of customized tours and also partner of Italian and foreign agencies and companies for the planning, organization and holding of meetings, conferences, incentive and events in Italy and abroad. In 2006 she created a new business division for incoming in Canavese, Turin and Piedmont: "Pronto Events" and in 2010 she developed, after a master in fundraising at the Bologna University, a new division: "Prontoetica" supporting profit companies which invest in the non-profit sector. She is also the president of the "Il Giardino di Giò", an Italian association of volunteers dealing with the intergenerational dialogue between young people and elderly people.
