B. Profile

Type of Organisation	Non-governmental organization/association
Is your organisation a public body?	No
Is your organisation a non-profit?	Yes
Is your organisation: a public body at regional/national level; an association of regions; a European Grouping of Territorial	No

C. Accreditation

Have you received any type of accreditation before submitting this application?	
Accreditation Type	Accreditation Reference
	N/A

D. Background and Experience

Please briefly present the partner organisation.

Intensify World was founded in 2019 by three young engineers, in Macieira de Rates, a rural parish in the municipality of Barcelos in northern Portugal. Its purpose is to promote a positive transformation of its local community, through the promotion of actions that generate opportunities that could contribute to the resolution of existing social problems. Our action is

developed around 4 pillars: **Education, Solidarity, Environment, and Technology**, to develop social and recreational activities based on engineering activities, technologies, and related techniques.

The Association's objectives are achieved through the design of goods, provision of services, and other initiatives to promote the well-being and quality of life of people, families, and communities in the following main areas: family support; support for the elderly; support for social and community integration; social protection of citizens in the event of illness, old age, disability, and death, as well as in all situations of lack or reduction of means of subsistence or ability to work.

The Association also proposes to develop the following secondary objectives: contribute to sustainable development; share knowledge and resources with the community; promote social inclusion and cohesion; raise awareness for the preservation of the environment; promote digital literacy, promote equal opportunities and gender equality, facilitate access to new technologies for audiences that tend to be excluded.

Intensify World develops its action based on a set of strategic partnerships, mobilizing local actors in pursuit of the common good. With us, technology is placed at the service of the population to provide the greatest well-being and maximum dignity. Intensify World's activity aims to cover the entire community, however, due to its 4 lines of action, we highlight that education and technology activities are aimed especially at children/young people and seniors, solidarity activities at economically vulnerable groups, and environmental activities have the entire community as a cross-sectional target audience.

What are the activities and experience of the organization in the areas relevant for this application?

Intensify World has goals developed around 4 pillars: Education, Solidarity, Environment, and Technology.

Education effectively contributes to the emergence of new practices of democratic citizenship and Inclusion, school and social, and our objective is to develop simple actions of inclusive education that promote equality and tolerance. Activities Workshops; school support and non-formal education; recreational activities for sharing knowledge and intergenerational and intercultural community activities.

Solidarity The concept of social solidarity implies the idea that all people feel that they are part of the same community and, therefore, feel interdependent. We want to promote mutual aid and social cohesion between different. Activities Activities and projects that promote sharing and social inclusion; Collection of food items, clothes, school supplies, and other goods for donation; Social Stores for redistribution of donated goods.

The environment is home to countless living beings. Its beauty is unparalleled. We must do everything we can to protect it. Our objective is to make the community aware of the importance of preserving our planet, as a responsibility that belongs to everyone. Activities Collection of polluting material and garbage; Collection, Separation, and Reuse of highly polluting material; Refurbished appliances workshop; Environmental awareness actions.

Technology is a tool for social inclusion, capable of improving the world around us. Our goal is to provide everyone, and especially younger people, the opportunity to access technological equipment free of charge, to promote greater interest in STEAM areas. Activities Robotics laboratory (Virtual reality, robotics, 3D printing, artificial intelligence, software development);

participation in fairs, workshops, and technological events; Computer support actions for other entities in the social and solidarity sector.

What are the skills and expertise of key staff/persons involved in this application?

Luís Dias is the president of IW. He holds a degree in Industrial Electronic and Computer Engineering, specializing in Programming and Hardware Development. He also has training in project and career management. He is a certified trainer and has an extensive network of contacts.

José Alves is the treasurer of the association. He holds a degree in Computer Engineering, specializing in Web Programming, website creation, and application development.

Carlos Barros is a volunteer for the association. He holds a degree in Electronic Engineering, specializing in space automation and social networks.
