Fax	
Profile	
Type of organization	Non-governmental organisation
Is the partner organization a public body?	no
Is the partner organization a non-profit?	yes

Accreditation	
Has the organization received any type of accreditation before submitting this application?	
Accreditation Type	Accreditation Reference

Legal representative	
Title	Mr
Gender	Male
First name	Anıl
Family name	KARAÇAY
Department	Computer Engineering
Position	President, Founder
Email	anilkaracay@gmail.com
Telephone 1	+90 506 050 10 29

Please briefly present the partner organisation (e.g. its type, size, scope of work, areas of specific expertise, specific social context and, if relevant, the quality system used)

Our team already exists as a community called Çankaya Blockchain Community in Ankara, Turkey. Our background experience is about the Çankaya Blockchain Community.

Çankaya Blockchain Community was established on 11th November, 2021 to increase the interest in Blockchain Technology, which is the technology of today and the future, to bring people who are interested in this field together and to train well-educated individuals. Çankaya Blockchain Community is a University based community.

Before the establishment of Çankaya Blockchain Community, there were only three blockchain communities in Turkey and there was only one blockchain community in our region Ankara, which is the capital city of Turkey. Because of that, the establishment of the community made a huge impact.

First appearance of the Çankaya Blockchain Community in the blockchain ecosystem was the İstanbul Avalanche event on 3rd December, 2021. After that, Çankaya University Blockchain Community team took second place in a Google Cloud-Bitci Hackathon, with their 'decentralized NFT application' project and they deserved to win the 15.000€ prize.

While the community was attending events and winning the prizes, they also created the first NFT design collection, which is the first NFT that was designed and released by students, of the Çankaya University for the 25th anniversary of the school. The collection was published at OpenSea digitally and at school physically. The community is still adding

new designs to the collection for every special occasion and for anniversaries. At the same time, they have released the first university token and 25 million of it is still in circulation. In addition, the community has been building a land on Radio Caca universe, in which Elon Musk's mother Maye Musk is also a shareholder. They organized their first Metaverse Dance event on that land. The Çankaya Blockchain Community have attended dozens of events, which are most of in İstanbul, and have met hundreds of people. Last event they attended was Avalanche Summit 2 which was in Barcelona. When they came back from Barcelona, they won first place and the prize at HackJuno Turkey in the GameFi department with their project "Gatecon".

As the community develops itself, they also continue to educate the people who are interested in the Blockchain ecosystem. For example, they organized the trainings "Blockchain 101" to instruct people about Blockchain and web3 technology. Furthermore, they have started a series called "Anadolu Blockchain Summit" and they organized the first two events in the cities Ankara and Eskişehir. The purpose of these series is to bring together all the blockchain communities and blockchain enthusiasts in Turkey. Now, the community is organizing a new online training series called "Education Summit 2" with Binance Türkiye. Çankaya Blockchain Community continues to progress by developing and growing itself.

Some of the organizations Çankaya Blockchain Community previously worked with:

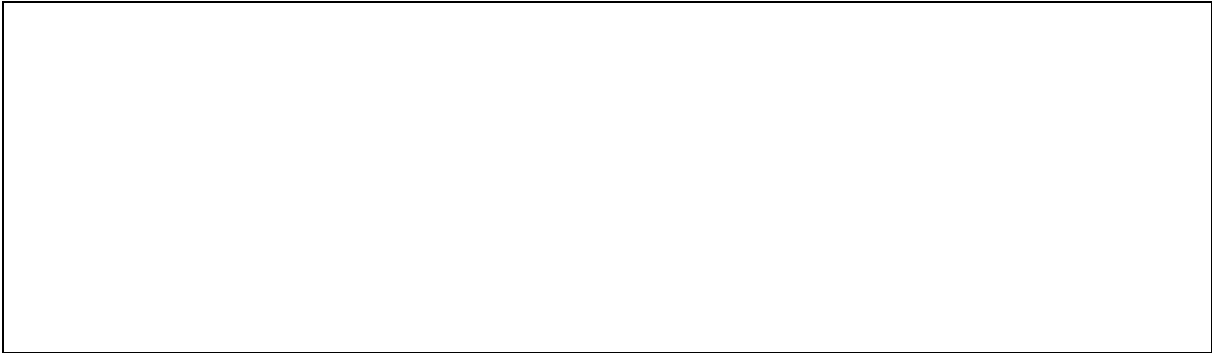

Binance, Chainlink, Lbank, Dats Project, Altkointürk, Coinox, Respect Trade, NEAR, Atlas Space, NFT Summit İstanbul, Blockchain Economy, QANplatform, XT , Patika.dev , The Venture Hub , Airdrop Turkey, Poloniex, Web3 Derneği, Crypto Female, Solana Foundation, etc.

What are the activities and experience of the partner organisation in the areas relevant for this project?

The Çankaya Blockchain Community, in general which has projects in Turkey, has chosen its target as local, national and international youth between the ages of 15-25.

The Çankaya Blockchain Community has various events and projects to promote blockchain and web3 technology. The first of these is their event called "Blockchain 101". This project aims to introduce young people in Turkey to Blockchain technology and to inform them about it. Thanks to this project, young people get blockchain training, develop themselves on this subject, and expand their circles by networking with other young people at these events.

There is almost no diversity in location in Blockchain and Web3 events held in Turkey, most of the events take place in İstanbul, which makes it difficult for young people who want to participate in these events and network in other regions of Turkey. The Çankaya Blockchain Community launched the "Anatolian Blockchain Summit" to overcome this challenge. To be able to reach young people from every city easily by traveling all over Turkey, in order to include them in this sector.

What are the skills and/or expertise of key persons involved in this project?

Anıl Karaçay, as the Founding President of the Çankaya Blockchain Community, has demonstrated remarkable leadership skills and actively engaged with his community in diverse events, allowing him to connect with thousands of individuals over two years.

Anıl's relentless pursuit of excellence is evident throughout his journey. He took a significant leap forward in digital assets by introducing their first university token and publishing the inaugural NFT collection created by university students. Currently serving as a front-end developer at Bitci exchange and as a representative in Dats Project, Anıl balances his responsibilities while pursuing degrees in computer engineering and business administration.

The accolades Anıl has garnered for his community speak volumes about his management abilities. His team achieved remarkable success through his guidance, securing top positions, such as 1st and 2nd place, in the two hackathons they participated in. In addition, he launched a series called Anadolu Blockchain Summit. Anıl's establishment of the Anatolian Blockchain Summit series not only amplifies his influence but also fosters industry growth by bringing together experts and enthusiasts, driving innovation and advancement in the field.

Anıl's significant presence on social media platforms like Twitter and LinkedIn, boasting many followers, further underscores his impressive network. With his achievements and dedication, Anıl Karaçay inspires others, leaving an indelible mark in the field of blockchain.

Ceren Şahin started her role as the General Coordinator of Çankaya Blockchain Community, demonstrating exceptional leadership skills in managing the community. Additionally, she contributes to significant projects undertaken by the community, such as the release of the first NFT collection and the introduction of a university token. Ceren actively engages in marketing activities, enhancing the community's visibility through social media management. Over the course of two years, she has actively participated in various community events, establishing

connections with thousands of individuals. Furthermore, Ceren, who is also an electrical and electronic engineering student, works as an ambassador at Lbank exchange.

Together with Anıl Karaçay, the founder of Çankaya Blockchain Community, Ceren initiated a noteworthy series called the "Anadolu Blockchain Summit." This summit not only amplifies Ceren's influence but also brings together experts and enthusiasts to foster innovation, progress, and support the industry's growth. Through her role, Ceren gained valuable experience in organizing events and establishing connections with businesses. Additionally, her substantial following on social media platforms such as Twitter, LinkedIn, and Instagram further emphasizes her influential network. Ceren Şahin leaves an indelible mark in the blockchain field, inspiring others through her achievements and dedication.

Has the partner organization participated in a European Union granted project in the 3 years preceding this application?
