Background and Experience

EasySustainability in a nutshell

Easysustainability is first and foremost a safe space where to practice sustainability skills and network in the field through an online global community of enthusiastic and professionally diverse activists.

Our cause consists of supporting youth in their journey towards greener careers, and our activities aim to maximize their chances to land greener jobs.

We do it through several non-formal educational methods such as online coaching, job shadowing and job simulations. We also offer a tailored web platform with tools (e.g. dedicated personal development plans) to prepare young people for the reality of the job market.

Easysustainability relies on a network of several partnerships with leading institutions, NGOs, digital providers, employers, and individuals active in the field of sustainability

OUR CAUSE

Upskilling youth in order to maximize their chances to land greener jobs.

ACTIVITIES & TOOLS TO PURSUE OUR CAUSE

Erasmus+ Projects,
tailored website, editorials,
coaching, AI & Digital tools,
webinars, campaigns and
much more

Areas of action:

Our activities mainly encompass the following areas:

Startup Acceleration & Think-tank

Activities involving social entrepreneurship, pro-bono consulting, spinoffs and innovation

Awareness Raising

raising awareness to foster more sustainable individual behaviours, including eating habits, wellbeing and more

Corporate Activism

Fostering corporate social responsibility, ESG reporting and sustainable organisational practices in corporate

Global South

Activities involving the Global South such as combating social inequality and deforestation

STEM

Activities involving STEM subjects such as web development, Climate, Biodiversity, Circular Economy, Pollution Prevention and much more

Discover our platform:

easysustainabilityngo.org

Our website consist on a digital platform for young job seekers and is our key asset. It was built from scratches by our volunteers and is under continuous update.

This is a non-exhaustive list of what you can find there:

Key Success stories

While our success stories are numerous, it is important to mention in this document that one of our volunteers, Viktoriia, got one of its papers produced at Easysustainability approved by the World Commission on Environmental Law (WCEL) and presented it at a conference in Morocco.

“

It was a great pleasure and an honor to take part in this Congress and to contribute, as a representative of the Easysustainability NGO, to the session "Integrating the Protection of Soils, Biodiversity, and Climate Change," engaging in discussions with outstanding scientists on today's pressing challenges in agriculture, foodsecurity, and foodaffordability. It was also a privilege to engage with leading scientists, lawyers, judges, and experts in the fields of environmental and legal studies along with the other distinguished panelists, for their valuable contributions in exchanging ideas and exploring solutions for a more sustainable future. Last but not least, my sincere thanks to the IUCN World Commission on Environmental Law, the Centre International Hassan II de Formation à l'Environnement, the entire organizing team for creating such a warm and welcoming conference atmosphere and for their generous hospitality.

Professional networks & initiatives

We recently joined leading sector initiatives such as the sustainability reporting Forums and alliances. We are in the progress to join more of them to maximise the exposure of our people to leading sustainability experts and give them the possibility to contribute to impactful initiatives and deliverables. Please note that entering these professional networks and initiatives does not imply any endorsement or promotion of Easysustainability by them.

Activities

Our activities

1- Projects

Projects can be open-source or adapted to official schemes (e.g. Erasmus+) knowledge-intensive or beginner-level. We give the maximum flexibility and empower youth to manage their own projects. We usually nominate a delegate project manager for

each project to lead it and thus make the most of this experience (we indeed aim to help our participants develop not only hard skills, but also “soft skills” such as leadership and teamwork).

The “volunteering for social inclusion” journey in Stara Zagora, Bulgaria

Our projects cover a wide range of topics aligned with our commitment to corporate sustainability and greener careers for youth. Examples of completed works include:

- Two volunteer upskilling programmes with Emeis Global and TEAM NEST, which were remote and flexible;
- Biodiversity finance project with Octopolis Foundation.
- 15+ Erasmus+ KA1 projects on a variety of sustainability topics

These projects helped volunteers learn about SCRUM, business planning, technological tools, social entrepreneurship, sustainability consulting, and several other skills, enhancing their professional networks and employability.

Learning eco-friendly diets - Poland

Learning visual tools - Armenia

Discover our
opportunities

We also give the opportunity, when Italian law allows, for students to participate in curricular internships at Easysustainability in order to develop relevant experience in the job market regarding sustainability and/or non-profit management.

Currently we also are promoting a voluntary initiative of remote sustainability job-shadowing and sustainability manager simulation programs, matching tens of mentors and mentees on green career development.

Our February 2026 application portfolio

Topics of interest:

environmental and social sustainability,
as well as soft skills development.

KA152-YOU and KA153-YOU:

We can consider only applications as sending partners only on strategic topics such as regenerative agriculture and biodiversity

KA122 and KA210: we are open to explore partnerships in KA122-ADU and KA210-YOU or equivalents with the main goal of capability building and knowledge sharing among partners.

Other funding schemes (e.g. KA220, KA3 and EU Horizon):

open to explore co-application opportunities into work packages specific to sustainability and where our involvement is marginal and as a newcomer organisation.

Our activities

2 - Campaigns and Initiatives

Our strong professional network allowed to successfully run a series of webinars together with the NGO YES Europe and others.

The webinars fostered insightful discussions on pertinent sustainability topics, having among the partners speakers from global leaders such as Harvard Business School Online Community DACH and Rome, as well as impactful startups such as Arabat and Bamboo energy, and institution/corporates such as the International Energy Agency and Ramboll.

These webinars have provided opportunities for experts and enthusiasts to exchange ideas and knowledge, contributing to collective understanding of sustainable practices for youth following them.

Powering a Sustainable Future

The Battery Recycling Revolution.

Our activities

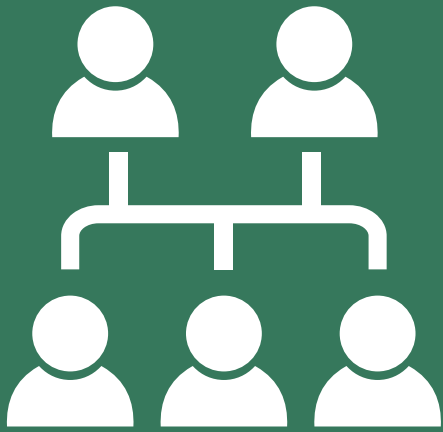

3 – Editorials

Moreover, we actively engage in information dissemination through editorials and social media content, where we provide valuable insights on sustainability to our community.

These editorials serve as a valuable resource, keeping our stakeholders informed about the latest developments, best practices, and innovative solutions in the realm of sustainability.

KEY VOLUNTEERS

Etibar Mikayilov

Etibar Mikayilov is a Ph.D. candidate in Mechanical and Management Engineering with a strong background in chemical and environmental engineering. He has international experience as a project manager and researcher in 18 Erasmus+ and HORIZON projects on digitalization, energy, and sustainability. As a trainer and member of global networks, he actively contributes to the energy transition and the promotion of sustainable practices.

Viktoriia Pylaieva

Viktoriia is a lawyer, legal specialist in sustainable development, scientist, and author with experience across private and public sectors as legal adviser, judge assistant, and lecturer. Her expertise covers environmental law, human rights, ESG, EU taxonomy, energy transition, and climate strategies, complemented by an LLM in Law and Sustainable Development from the University of Milan. As legal adviser at EasySustainability NGO and climate activist, she contributes to ESG reporting, anti-greenwashing analysis, and global initiatives such as the Universal Declaration of Ocean Rights and sea-level rise adaptation efforts.

**Agostina
Pedreira**

Agostina is a communications professional with over two years of experience in international marketing, creating strategic content to drive growth across continents. She is now transitioning into the sustainability field, driven by her passion for using storytelling and strategic messaging to support companies with environmental and social impact. Agostina focuses on aligning business goals with the UN Sustainable Development Goals (SDGs). She is seeking roles within the sustainability field.

Jessica Groba

Jessica is a biologist holding a Master's degree in Conservation, Management and Restoration of Biodiversity. Experienced as Conservation biologist and passionate about sustainability issues and climate change. Her goal is clear: contribute in a meaningful way to a more sustainable future and have a positive impact in future generations

Leticia Bohn

Leticia is an Environmental Engineer and certified Black Belt with proven results in sustainability, achieving 80% resource reductions and €100k annual savings. With diverse global experience, she leads improvement projects in the Netherlands and promotes environmental growth and learning.

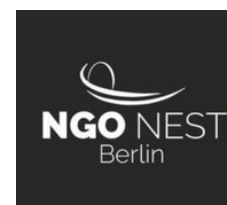

Oktarina Masitha

Oktarina is an investment consultant and portfolio manager with 8+ years of experience in private equity, capital markets, and alternative investments. She has managed USD800mn+ in assets, specializing in capital strategy, deal execution, and governance for infrastructure investments.

...with the addition of a vast pool of 150+ qualified volunteers from our online community

OUR PARTNERS (non exhaustive list)

Legal Notice & Appendixes

COMPLIANCE AND PARTNERSHIP TRANSPARENCY

Decision-making and contractualistic

Please note that we are signatories of the manifesto for responsible partnerships, and each violation of such manifesto from our partners will lead to immediate termination without notice. All the names of official institutions co-financing our projects such as the EU for Erasmus+ does not entail any direct endorsement or promotion of Easysustainability.

All contracts signed by Easysustainability president are subject to amendments to make such agreements fully compliant with Italian code of the third sector (L. 26 Luglio 2023,n. 95) and pre-existing contractual obligations of Easysustainability staff with other employers, whether any doubt on such compliance arises.

Beware of individuals falsely claiming to be decision-makers at Easysustainability. Only officially registered members (associates), holding written authorization by the director board and/or associates assembly, are authorized to represent Easysustainability, sign partnerships, and contracts, or engage in similar activities. Any unauthorized activity by non-registered members is considered invalid.

If you suspect someone is improperly representing Easysustainability, please contact us at admin@easysustainabilityngo.org and report any suspicious activity.

Partner onboarding: KYC, AML/CFT processes

We commit to respecting some basic but very important rules, and when onboarding new partners, we need to respect both our statutory provisions and the rights of our already-existing partners (see more in the compliance section of our website).

Our partners come from different backgrounds (corporate, civil society, institutional and more), and to respect their modus operandi, whenever substantial fundings are involved (i.e. more than 60,000 EUR, thus budgets going beyond KA210 Erasmus+ limits), we will also carry out some necessary KYC process with our lawyers, facilitated via the form below:

[Please fill this form to request partnership for major projects](#)

IMPORTANT NOTICE

This document has been prepared by Easysustainability ETS exclusively for the purpose of allowing the intended recipients to assess the capabilities of Easysustainability ETS in connection with a potential partnership.

The information presented herein has been compiled by Easysustainability ETS and may include content derived from external sources that has not been independently verified or audited. Certain portions of this document also contain proprietary information belonging to Easysustainability ETS. Except for the limited purpose of evaluating the organization's capabilities, the contents of this document should not be relied upon for any other use. No representation or warranty, whether express or implied, is made, and no responsibility or liability shall be assumed by Easysustainability ETS, its partners, members, employees, agents, or any affiliated party, regarding the accuracy, completeness, or reliability of the information provided.

Unless otherwise stated, this document and its contents are confidential, intended solely for your review, and may not be copied, shared, or distributed, in whole or in part, to any other individual or entity. No third party may rely on this document for any purpose, and Easysustainability ETS disclaims any liability to such parties who may gain access to it.

This document does not constitute a partnership offer and is not intended to create any binding obligations. Should you wish to pursue a partnership with Easysustainability ETS, and subject to the successful completion of our internal approval processes, we would be pleased to engage in discussions regarding terms and conditions prior to entering into any partnership mandate or equivalent agreement.

Easysustainability ETS comprises: (i) an association without legal personality registered in Livorno, Italy; (ii) the affiliated Easysustainability online community; and (iii) other informal youth groups operating within the Easysustainability online community. Easysustainability ETS acts as the affiliate for Italy of the Easysustainability Global Foundation, a public interest foundation to be registered in Malta. Further information can be found at easysustainabilityngo.org. Easysustainability Global Foundation and each of its affiliates are independent legal entities.
