CLARIFICATIONS YOU DIDN'T ASK FOR (and didn't know you needed)

Why Values & Character Strengths on a CV?

I believe that a meaningful and productive collaboration stems from a common vision and a team motivated to work together to achieve it. Awareness of what we believe in and how we work towards it can be the first stepping stone on that common journey.

What are "Skills for the 21st Century"?

The advent of the 21st century has met with an accelerating pace of change in economy and technology, severely affecting work and education. 21st century skills are skills, abilities, and learning dispositions identified as critically important for success in today's world. Many of them are also associated with deeper learning, which is based on mastering skills such as analytic reasoning, complex problem solving, and teamwork.

What is Experiential Learning & Gamification?

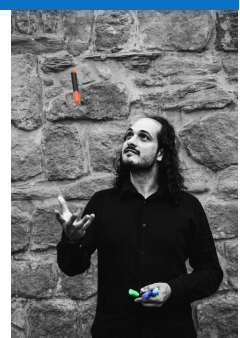

- **Experiential Learning** means learning through experience or, more specifically, "learning through reflection on doing". From Aristotle to Kolb, the main premise is that the learner plays an active role in their own learning process.
- **Gamification** stands for "applying game-design elements & game principles in non-game contexts". It can improve engagement, productivity and flow. I specialise in applying it on learning and development.
